

LG Neon GT 365 Teardown

This guide (my first) will detail the teardown of a GT365 of the NEON class LG phones. This is the AT&T model, but should be the same all around.

Written By: Kendall Bartling

INTRODUCTION

This guide (my first) will detail the teardown of a GT365 of the NEON class LG phones. This is the AT&T model, but should be the same all around.

TOOLS:

- [Phillips #000 Screwdriver](#) (1)

PARTS:

- [Spudger](#) (1)

Step 1 — Remove the Back Cover

- Simply push the button on the top and pry (with hands) the back cover off.

Step 2 — Remove the Battery

- This is simple. Pull up from the bottom and lift the battery out! (No glue, YAY!)

Step 3 — Remove SIM card, and also the SD card (if applicable).

- No pictures required.
